

# #25

## *BRIGHT IDEA*

Don't hide the architectural features that make your home special; show them off! Instead of concealing the structural support in their home's rear extension, architects David Tigg and Rachel Coll of Tigg+Coll ([tiggcollarchitects.com](http://tiggcollarchitects.com)) painted it electric red. 'We exposed the steel beam to form a seam that playfully highlights the width of the room,' says Tigg. This hue is 'RAL 3001', which is actually more typically used as an industrial machinery paint. From £13.99 for a 300ml spray can ([ralcolours.co.uk](http://ralcolours.co.uk)).
